

PRODUCT DESCRIPTION

KRAV extrusions are not construction extrusions! They are designated exclusively to illuminate glass or acrylic. Therefore, assembly, suspension, or other technical activities related to the panels should be performed using standard elements. Complete KRAV 810 extrusion consists of 2 extrusions: KRAV-D810 dedicated for mounting LED tape up to 10 mm (0.39") wide and KRAV-Z810 extrusion – the closing extrusion. Additionally the extrusions are equipped with mounting adhesive tape and a silicone strip that assures a solid connection of the two extrusions.

Patent Number: US D809,704 S

- Easy and secure mounting to panel edges
- Convenient installation of LED strips
- Adapted for panels with a thickness of 8-10 mm
