

DECÒ

CATALOGO 2023

Nata dalla passione per la produzione di elementi per l'illuminazione in ceramica, con un'estrema cura per i dettagli e la loro unicità, DECò rappresenta il desiderio di esplorare una nuova espressività, unica e libera da schemi.

The passion for the production of ceramic lighting fixtures with an extreme attention to details, led us to the creation of Decò collection. Decò represents the desire to explore a new expression, unique and out of schemes.

Come nelle percussioni tradizionali afro-brasiliane, la rigidità delle superfici viene interrotta da immaginari tagli netti, una gabbia che sembra stringersi attorno a un volume che, al contrario, preme per uscirvi e trasmettere la propria vitalità, a sua volta testimoniata dal dinamismo delle finiture lucide e brillanti volte a proteggere il cuore luminoso racchiuso al loro interno.

As seen in traditional Afro-Brazilian percussion instruments, the stiffness of the surfaces is interrupted by imaginary clean cuts, a cage that seems to close around a volume that, on the contrary, pushes to emerge and express its vitality, which in turn is revealed by the dynamism of the glossy, shiny finishes that protect the luminous heart enclosed within them.

AYRTON

C2550

Allo stesso modo delle superfici lucide e sfuggenti dei caschi da automobilismo, Ayrton riflette ed enfatizza la luce che ne impatta la superficie, disegnando sagome luminose sulla sua liscia pelle vetrosa che conferisce grande profondità allo smalto. Il suo volume viene tagliato inferiormente per massimizzare l'uscita luminosa, che riempie le superfici interne e vi fuoriesce con una resa ottimale, direzionando leggermente il fascio di luce.

Just like the shiny and elusive surfaces of motoring helmets, Ayrton reflects and emphasizes the light that touches its surface, outlining shimmering contours that, on its smooth vitreous skin, give great depth to the varnish. The lower part of its volume is cut to maximize the light output that fills its inner surfaces and optimally releases while slightly directing the light.

BATUCADA

C2590

BATUCADA

C2590

L'ipnotica percussività dei ritmi carioca avviene tramite l'utilizzo di strumenti primordiali: le mani. Proprio per omaggiare le mani degli schiavi neri, i primi percussionisti brasiliani, capaci di “batucar” i tamburi e far danzare la gente in una mescolanza di musica e religione, Batucada sembra voler tenere la sorgente, preziosa fonte di luce, tra due mani, celandola o rivelandola all'occorrenza.

The hypnotic percussiveness of the Carioca rhythms is achieved with primordial instruments: the hands. To pay homage to the hands of black slaves, the first Brazilian percussionists who could “batucar” drums and make people dance in a mixture of music and religion, Batucada seems to want to hold the precious source of light between two hands, hiding it or revealing it when needed.

BELLOTA

C2540 C2541 C2542

BELLOTA

C2540

La regolarità della superficie, un'ispirazione fitomorfa espressa da un solido di rivoluzione che alterna rigidità lineare e morbidezza curvilinea, la tecnica decorativa dell'ingobbio che esalta i volumi con finiture lucide e opache sono le caratteristiche principali di una lampada a emissione diretta, la cui sorgente emerge dal volume principale senza venire schermata, per massimizzare l'emissione luminosa.

The evenness of the surface, a phytomorphic inspiration expressed through a revolutionary solid that alternates linear rigor and wavy softness, and the decorative technique of the engobe that highlights its volumes with shiny and opaque finishes, are the main features of this direct light lamp. Its main source emerges unshielded from the main body to maximize the light emission.

Un oggetto archetipico che nasce dalla tecnologia che ospita: così il volume principale, creando un offset della sorgente a bulbo, diventa il leitmotiv di una collezione diversificata dove centrale è proprio l'elemento illuminante, declinato in più applicazioni e funzioni, ma che mantiene invariata la propensione decorativa delle sue forme e le finiture lucide che ne esaltano le superfici arrotondate.

An archetypal object that is born from the technology it houses: the main volume, by creating an offset of the bulb source, becomes the leitmotif of a diversified collection where the lighting element itself is central. Declined in several applications and functions, it maintains the decorative propensity of its shapes and the glossy finishes that enhance its rounded surfaces.

PAZ E AMOR

CAXIXI

In foto / in the picture:
C2400 GIL, ROC

C2400

C2400

Ritmo e rigore. Sono i requisiti che ogni musicista brasiliano deve possedere per produrre i tipici ritmi carioca, ma sono anche le caratteristiche principali dei volumi di questa lampada a sospensione, netti e armonici, i quali rendono ancora più evidente la finitura superficiale: un parziale bagno di cristallina, realizzato a mano dal ceramista e quindi in modo sempre diverso, che una volta cotta rivela la lucentezza del prodotto in maniera selettiva, intensificando il colore e ponendo l'accento sulle forme curvilinee del volume principale.

Tempo and precision are elements that a Brazilian musician needs to create typical carioca rhythms, but they are also the main characteristics of the main body of this suspension lamp. Clean and harmonious features highlight the finishes on its surface: a partial crystalline bath, hand-made by the ceramist and thus always different, that once fired reveals the glaze of the product, intensifying its color and emphasizing its rounded shapes.

CHURUATA

C2580

Esili e appena percettibili paralleli generati dall'andamento a falda si rincorrono, abbracciandolo, un volume teso e spigoloso che richiama le tradizionali capanne del Sud America, mentre la finitura opaca ne ammorbidisce il profilo, smorzandone i riflessi e restituendo la percezione di superfici morbide e armoniche, porose e naturali.

Slender, barely perceptible parallels, created by the pitch pattern, chase one another embracing a taut, angular volume reminiscent of the traditional huts of South America. The matt finish softens its profile, muffling its reflections and restoring the perception of soft, harmonious, porous, natural surfaces.

Se passerete per le strade di Copacabana vi imparerete sicuramente sulla camminata di ciottoli a mosaico di Roberto Marx, una piastrellatura modernista dove architettura e natura si incontrano attraverso un nuovo linguaggio stilistico. Sovrapponendo le nostre lampade la potrete rivedere... con un tocco di luce in più.

If you walk along the streets of Copacabana you'll for sure come across the mosaic path by Roberto Marx. It's a modernist tiled surface where architecture meets nature through a new stylistic language. Put together our lamps and you will see it... with an extra touch of light.

CORCOVADO

C2740

Eccentrica e colorata, la lampada prende il nome da uno dei monti più famosi di Rio de Janeiro, sulla cui cima è posizionato il Cristo Redentore.

I colori accesi di Corcovado ricordano quelli della bandiera brasiliana, e portano nell'ambiente la vivacità e la vitalità tipiche del carnevale di Rio.

Extravagant and colorful. This lamp takes its name from one of the most famous mountains in Rio de Janeiro, on the top of which stands the statue of Christ the Redeemer. The bright colors of Corcovado recall those of the Brazilian national flag and give the room the typical vitality of the Carnival in Rio.

Come in un gioiello, i brillanti elementi ceramici di Lariat si susseguono verticali a formare una variegata catena multicolore, che procede alternando le geometrie sino ad arrivare all'elemento più prezioso che si trova alla sua estremità e che contiene l'elemento luminoso.

Just like a jewel, the bright ceramic elements are organized in a vertical series that forms a varied and colorful chain. This chain progresses while alternating geometries until it reaches the most important element that contains the lighting element.

C2570 C2571 C2572 C2573

MADAME GRÈS

C2570

Con le sue superfici mosse e gli intagli verticali che si ripetono lungo tutto il suo perimetro, il diffusore di Madame Grès ci ricorda più un capo d'abbigliamento plissettato o una confezione tessile morbida e mossata piuttosto che un elemento rigido e statico. Le sue superfici, decorate da una finitura a ingobbio opaco che ne ingentilisce ancor più le forme rendendole tenui e setose, si aprono attorno alla sorgente luminosa, generando un ampio fascio di luce che illumina in modo consistente gli ambienti circostanti.

With its undulated surfaces and vertical inlays that repeat themselves along the whole perimeter, the Madame Grès diffuser reminds us of a pleated garment or a fabric rather than a rigid and motionless element. Its surfaces are decorated with opaque engobed finishes that all the more refine its outlines, making them soft and silky. They open up around the light source, creating a wide beam that illuminates the surrounding environment.

MARACANÀ

C2741

Lampada costituita da due parti: quella superiore, in ceramica e dalla forma a ciotola, e quella inferiore, in vetro verniciato e naturale, che richiama, con il suo aspetto circolare leggermente rialzato, la costruzione degli stadi e delle arene. Da qui il nome della lampada, riferito allo stadio brasiliano per eccellenza: Maracanà.

This lamp is composed of two parts: the bowl-shaped upper part is made of ceramic and the lower part is made of painted and natural glass. Its round shape recalls the structure of stadiums and arenas. Its name refers to the Brazilian stadium par excellence: Maracanà.

Due volumi sovrapposti che interagiscono tra loro in una dialettica fatta di sfericità e lucentezza, enfatizzata a sua volta da una finitura brillante che sottolinea le superfici ed evidenzia al massimo l'estensione volumetrica dell'oggetto sospeso. La sorgente, posizionata inferiormente e parzialmente schermata dal corpo lenticolare, si apre liberamente all'ambiente che illumina.

Two overlapping volumes interact with each other in a dialogue made up of roundness and brightness, emphasised by a glossy finish that underlines the surfaces and highlights the volumetric extension of the suspended object to the full. The source, positioned in the lower part and partially screened by the lenticular body, opens freely to the environment it illuminates.

La precisione formale e la rigidità dei volumi è il carattere distintivo di questa collezione che, coniugando sapientemente forme geometriche regolari a pattern caratteristici ed elementi tecnici a scomparsa compone figure di grande impatto e quasi metafisiche, capaci di inserirsi senza alcun problema in ambienti di differente ispirazione e carattere. Disponibile in molte varianti e applicazioni, la collezione Pi fa un ineccepibile utilizzo delle tecniche di decorazione ceramica, che riquadrano superfici ricche, piacevoli e bilanciate.

The formal precision and rigor of the volumes are the distinctive features of this collection that, skillfully combining regular geometric shapes, distinctive patterns and concealed technical elements, create shapes of great impact that are almost metaphysical and are able to fit perfectly in different environments. Available in several variants and applications, the Pi collection makes impeccable use of decorative ceramic techniques as they surround rich, pleasant and balanced surfaces.

La forma scalettata della lampada prende a modello l'escadaria più famosa del Brasile, decorata dall'artista Jorge Selarón, e raffigura la continua evoluzione stilistica di Ferroluce, unendo la passione per l'innovazione con la continua sperimentazione di forme e colori.

The stair-shape of the lamp takes inspiration from the most famous escadaria in Brazil, a work by the artist Jorge Selarón. It represents the continuous stylistic evolution of Ferroluce that combine the passion for innovation with the constant experimentation of shapes and colors.

STORIA dell’Azienda

COMPANY HISTORY

I TEMPI CAMBIANO, FERROLUCE SI EVOLVE.
TIMES CHANGE, FERROLUCE EVOLVES

Ferroluce nasce nel 1982 dalla volontà di Miriam e Valter Valentinuz di creare delle lampade frutto dell’amore per la lavorazione della materia, prima del ferro e poi della ceramica.

Oggi l’azienda, grazie al supporto dei figli Monica e Giulio, guarda alla tradizione mantenendo un forte legame con la lavorazione artigianale e la materia, ma apportando al contempo nuove soluzioni tecniche e formali per uscire dagli schemi predefiniti ed esplorare nuovi mercati.

L’obiettivo? Dare vita a lampade capaci di far innamorare tutto il mondo, dalla Finlandia all’Asia fino agli Stati Uniti, e che sorprendono chiunque le guardi.

Ferroluce was born in 1982. Miriam and Valter Valentinuz wanted to create lamps, which would inspire the fruit of their love for iron and ceramic manufacturing.

Today the company, run with the help of Monica and Giulio, their daughter and son, still maintains a strong bond with the tradition through handmade manufacturing and materials, but at the same time it finds new technical and formal solutions to go beyond set patterns and explore new markets.

The aim is to create lamps for the whole world fall in love with, amazing everyone from Finland to Asia to the United States.

SVILUPPO del Brand

BRAND EVOLUTION

Dal ferro alla ceramica
per arrivare all'esplosione
di colori.

*From iron to ceramic with
an explosion of color*

DAL FERRO ALLA CERAMICA AL COLORE.
FROM IRON TO CERAMIC AND COLOR

L'azienda Ferroluce inizia il suo viaggio nella produzione di lampade creando plafoniere in ferro battuto: un materiale molto versatile e all'epoca apprezzato per la sua modernità ed eleganza. Col passare degli anni è cresciuta in noi l'esigenza di ricercare materiali diversi, che non solo avessero delle caratteristiche tecniche ottimali, ma che fossero legati anche ai nostri valori aziendali. Tutto questo lo abbiamo trovato nella ceramica: organica, duttile e particolarmente adatta alla lavorazione manuale, ancora oggi guida il nostro lavoro e, insieme allo studio di colori e stili innovativi, ci permette di sperimentare di anno in anno soluzioni d'illuminazione sempre nuove, che si adattano ai tempi che cambiano.

Ferroluce began its history in lamp production, creating wrought iron ceiling lamps. Wrought iron is a very versatile material and at that time it was highly regarded for its elegance and modernity.

During the years we had the need to find new materials with excellent technical features but also in line with our company values.

We found all this in ceramic: it's organic, ductile and particularly suitable for manual processing.

Even now it still guides our work, and, together with the study of innovative colors and styles, it allows us to continuously explore new lighting solutions adaptive to changing times.

LAMPADE “SLOW”, PERCHÉ NATE DALLA PAZIENZA E DALL’ATTENZIONE.
“SLOW” LAMPS, RESULT OF PATIENCE AND CARE

Vengono alla luce con pazienza, secondo un processo produttivo attento e lento che esalta la lavorazione di ogni dettaglio: sono le nostre lampade, realizzate una ad una attraverso quel che in gergo si definisce Slow Manufacturing, un metodo che valorizza la creatività e l’abilità manuale dei nostri artigiani permettendoci di creare prodotti di grande pregio, interamente fatti a mano, perfetti nelle loro imperfezioni.

Our lamps are made with patience due to a slow and precise manufacturing process that gives attention to every detail. They are handmade one by one through our “Slow Manufacturing” process. This approach enhances the creativity and manual skills of our craftsmen and allowing us to create completely handmade products of great value, that are perfect in their imperfections.

slow MANUFACTURING

ORGANIC

Abbiamo scelto la via della sostenibilità ben prima che questa fosse un tema di spicco all'interno della società. Adottando per le nostre lampade la ceramica come unico materiale produttivo, composta esclusivamente da argilla, quarzo e allumina, ci siamo voluti simbolicamente connettere alla natura che ci circonda. Per illuminare le vostre case con prodotti che racchiudono, in ogni loro dettaglio, la naturalità e la bellezza più pura. Come natura comanda.

We chose the philosophy of sustainability long before it was a prominent issue within society. We create a symbolic connection with nature by choosing ceramic as the only material. It's exclusively made of clay, quartz and alumina. Our products ensure in each and every detail the purest naturalness and beauty, just as nature intended.

UN LEGAME PRIMORDIALE CON LA NATURA.
A PRIMITIVE BOND WITH NATURE

CERAMICA

CERAMIC

LA LAVORAZIONE ARTIGIANALE PER DONARE UNICITÀ A OGNI LAMPADA.
UNIQUE HANDMADE LAMPS

Ogni prodotto Ferroluce è fatto a mano in un contesto che esula dalla produzione in massa. Grazie all'uso della ceramica, materiale rappresentativo dello spirito del brand, estremamente versatile e facilmente lavorabile, le nostre soluzioni di illuminazione rispettano l'ambiente e la tradizione di famiglia, donando al cliente un'eccellenza e un'unicità inimitabili.

Every Ferroluce product is handmade - far from the idea of mass production. Thanks to the characteristics of the ceramic, an extremely versatile and malleable material, our lighting solutions respect the environment and our family tradition, giving customers an unmatched excellence and uniqueness.

IL COLORE

COLOR

UN TUFFO NELLE SFUMATURE FERROLUCE.
A DIP IN FERROLUCE NUANCES

Amiamo sperimentare con i colori, e lo facciamo seguendo sempre un obiettivo: la ricerca della bellezza. Siamo convinti infatti che ogni singola sfumatura sia indispensabile per donare alle nostre lampade un carattere originale e distintivo, comunicando al tempo stesso emozioni e sentimenti diversi per ognuno di noi. Soprattutto nella nostra collezione DECò, abbiamo voluto dare risalto alle caratteristiche di ogni prodotto abbinando tra loro differenti tonalità di colore. Per creare lampade capaci di regalare emozioni impossibili da esprimere soltanto in forme

We love to experiment with colors and our aim is only one: the pursuit of beauty. We believe that every single nuance is essential to give our lamps an original and distinctive character that conveys different emotions and feelings to each of us. Especially in our Decò collection, we wanted to emphasize the characteristics of every product matching different nuances to create lamps that are able to emit emotions, not only through their shape but also through color.
